

## **WOWK:**

Analog operation: The station permanently terminated analog broadcasting on February 17, 2009, in accordance with FCC authority.

Breaking news coverage: On Saturday November 14, 2009, the area served by WOWK experienced a crippling snow storm that shut down most of the counties in the area. Parts of the State were without power and WOWK aired a live 3 hours emergency broadcast to provide breaking news about the storm and its impact, and to keep the public informed about the hazardous weather conditions, road closures, business and other closings, as well as where to go for emergency shelter. This three hour emergency broadcast superseded the regularly scheduled core children's programming block on November 14, 2009; however, the regularly scheduled children's programming qualifies as "core" pursuant to the "breaking news" policy stated by letters dated July 11, 1997 from the Chief, Mass Media Bureau, to Martin D. Franks, Senior Vice President, Washington, CBS, Inc., et. al, 8 CR 1036. It is respectfully noted that the electronic Form 398 does not accommodate "breaking news" explanations at Item 10. In accordance with informal telephone advice by the Deputy Chief of the Video Division, this matter is being reported in this exhibit to Item 17 rather than in a preemption report at Item 10.

Mid-quarter scheduling changes: A mid-quarter change in the program schedule is reflected in Item 10. Where the regularly scheduled slot for a program changed mid-quarter, program reports are provided for the program in both its prior regularly scheduled slot and its current regularly scheduled slot.
